

**If I Could Ask Santa
For Anything In The World,
It Would Be...**

A computer with all the accessories - I want a digitizer, optical disk drive, hard disk drive, color monitor, eight megabytes of RAM, a mouse, a Laserwriter printer, lots of programs, a 3.5 inch disk drive, and artificial intelligence capability. I would print banners, customize pictures, and maybe start a business. I would print cards instead of buying them. I could make my own decorations.
Eric Oberhardt
